

PRODUCT SPECIFICATIONS | REFLEX GYM PRO+

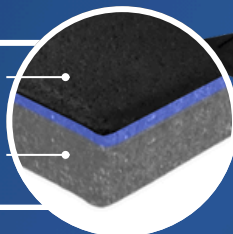

Applications

The GYM PRO+ rubber tiles feature a dual-layer construction that provides reliable protection and consistent performance in various training environments. The top layer is wear-resistant and easy to clean, maintaining its appearance over time. The underlying high-resilience base layer effectively absorbs vibrations and reduces noise levels. Suitable for use under fitness equipment, in free weight areas, and in home gym applications.

Available colours

*Highly abrasion-resistant,
easy-to-clean top layer*
*Extra-elastic base layer for vibration
absorption and noise reduction*

General information

Raw material	Density	Surface hardness	Certification type and reference number	Reaction to fire classification
SBR granulate + PU binder	800 kg/m3 (+/-5%)	55-65 Shore A	REACH;R-200320003619 EN 13501-12019 MO-T182X-31735-2025/2	Efl

Cleaning: The surface can be cleaned with mild detergent and water using a soft cloth or sponge. Abrasive cleaners, solvents, and strong acids or alkalis should be avoided.

Chemical resistance: The rubber tile shows good resistance to weak acids, alkalis, and mineral oils. Strong acids or alkalis, as well as prolonged oil exposure, may degrade its properties. Please test the material in the intended environment before chemical application.

100% recycled: The rubber granules are sourced entirely from recycled tires.
